☐ This opinion has been established on the basis of a translation from the original language into the following language ____, which is the language of a translation furnished for the purposes of international search (under Rules 12.3 and 23.1(b)).

2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:

a. type of material

☐ a sequence listing

☐ table(s) related to the sequence listing

b. format of material

☐ in written format

☐ in computer readable form

c. time of filing/furnishing

☐ contained in international application as filed.

☐ filed together with the international application in computer readable form.

☐ furnished subsequently to this Authority for the purposes of search.

3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

4. Additional comments:

INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/US05/02257

Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

1. The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non-obvious), or to be industrially applicable have not been examined in respect of:

- ☐ the entire international application
- ☒ claims Nos. Claim 4 is missing and therefore cannot be examined.

because:

- ☐ the said international application, or the said claim Nos. _____ relate to the following subject matter which does not require an international preliminary examination (*specify*):

- ☒ the description, claims or drawings (*indicate particular elements below*) or said claims Nos. 4 are so unclear that no meaningful opinion could be formed (*specify*):

Claim 4 is missing and it is unknown as to what the claim is directed to.

- ☐ the claims, or said claims Nos. _____ are so inadequately supported by the description that no meaningful opinion could be formed.
- ☐ no international search report has been established for said claims Nos. _____
- ☐ the nucleotide and/or amino acid sequence listing does not comply with the standard provided for in Annex C of the Administrative Instructions in that:
- | | | |
|----------------------------|--------------------------|-----------------------------------|
| the written form | <input type="checkbox"/> | has not been furnished |
| | <input type="checkbox"/> | does not comply with the standard |
| the computer readable form | <input type="checkbox"/> | has not been furnished |
| | <input type="checkbox"/> | does not comply with the standard |
- ☐ the tables related to the nucleotide and/or amino acid sequence listing, if in computer readable form only, do not comply with the technical requirements provided for in Annex C-*bis* of the Administrative Instructions.
- ☐ See Supplemental Box for further details.

WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY

International application No.
PCT/US05/02257

Box No. V Reasoned statement under Rule 43 bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims <u>9-15</u>	YES
	Claims <u>1-3, 5-8 and 16-18</u>	NO
Inventive step (IS)	Claims <u>NONE</u>	YES
	Claims <u>1-3 and 5-18</u>	NO
Industrial applicability (IA)	Claims <u>1-3 and 5-18</u>	YES
	Claims <u>NONE</u>	NO

2. Citations and explanations:

Claims 1-3, 5-8 and 16-18 lack novelty under PCT Article 33(2) as being anticipated by Bolla et al. and Garvey. Bolla et al. (see entire document and paragraph 232) and Garvey (see entire document and in particular claims 1-8) teach the claimed compounds and compositions.

Claims 1-3 and 5-18 lack an inventive step under PCT Article 33(3) as being obvious over Garvey and Bolla et al. in view of Letts et al., Garvey et al. and Earl et al. Garvey (see citation above) and Bolla et al. (see citation above) teach those compounds, compositions and similar methods claimed by the applicant and Letts et al. (see entire document and in particular paragraph 232), Garvey et al. (see entire document) and Earl et al. (see entire document and in particular paragraphs 353 and 356). Garvey and Bolla et al. teach similar compounds, compositions and methods of using nitrosylated and nitrosated compounds.

Claims 1-3 and 5-18 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
